- **Location:** E2-543B

If you can’t stop by office hours, read below for more information.

**UVENTURE Program**
Do you have lots of ideas? Want to work on disruptive technologies? Students, now is the chance to make your big ideas come to life! At Samsung Strategy and Innovation Center, our mission is to discover and develop groundbreaking technologies that will help people all over the world lead happier, healthier, richer lives. Samsung is a world leader in many technology industries, ranging from memory to smartphones to digital health and beyond. We are investing heavily in Silicon Valley and believe that the world’s biggest problems will be solved by people and companies working together. We invite visionary entrepreneurs and innovators to partner with us and give them access to our open ecosystem and unsurpassed resources.

Samsung Strategy & Innovation Center has launched a new UVENTURE competition open to undergrads and grad students at a small, exclusive list of universities. The goal of UVENTURE is to work with the most creative students and drive disruptive innovation through groundbreaking technologies that promise to create growth opportunities or flourish into future businesses.

We invite students (as individuals or small teams) to propose projects in the fields of:

- Artificial intelligence
- Robotics
- Mobility
- Digital health
- Natural user interface and AR/VR

The goal is to solve existing problems in a new way or address emerging user needs that current technologies don’t address. **Think big!**
Winning teams will receive an offer to join **Samsung as 2019 summer interns in San Jose and receive a $1,000 cash prize. During the internship you will work on your idea and get support by a mentor as well as Samsung’s R&D resources.** Now is your opportunity to make your ideas come to life and build new technology!

For details on how to participate, review the attached program documents closely:

- UVENTURE terms and conditions along with the release form that you must sign and return with your submission
- Detailed submission guidance and templates to leverage for your proposal

Submissions are due by **February 3, 2019**. For questions, contact **uventure@samsung.com**.
